Automation Testing Training Outline

Selenium Automation Testing Training

Automated software testing is a process in which software tools execute pre-scripted tests on a software application before it is released into production. Deep Infotech Automation testing course in selenium provide a complete practical oriented approach to write and execute test cases. In Automation Testing no manual intervention is required while executing an automated test suite.

There are Several Benefits Of Automation Testing:

- Reduction of repetitive work.
- Repeatability.
- Greater consistency.
- Ease of access of information.
