Magento Training Outline

Magento is a feature-rich, professional open-source eCommerce solution that offers merchants complete flexibility and control over the look, content, and functionality of their online store. Features includes powerful marketing, merchandising and content management. Magento is designed for scalability and is backed by an extensive support network.

Magento is an open-source content management system for e-commerce web sites. It employs the MySQL relational database management system, the PHP programming language, and elements of the Zend Framework. It applies the conventions of object-oriented programming and model-view-controller architecture. Magento also uses the entity–attribute–value model to store data.
